

Association – ArrayList

Exercises on ArrayList

```
ArrayList<Integer> numbers = new  
ArrayList<>();  
numbers.add(7);  
numbers.add(29);  
numbers.add(33);  
numbers.add(15);
```

7	29	33	15
---	----	----	----

- Choose the right method to change the ArrayList as follows:

7	29	8	33	15
---	----	---	----	----

- What is the size of this ArrayList? Add this number at the front of the ArrayList

Exercises on ArrayList

```
ArrayList<Integer> numbers = new  
ArrayList<>();  
numbers.add(7);  
numbers.add(29);  
numbers.add(33);  
numbers.add(15);
```

7	29	33	15
---	----	----	----

- Check if the ArrayList contains the element 33?
 - If so, show the position of this number.
 - If not, add this number to the list.

Exercises on ArrayList

```
ArrayList<Integer> numbers = new  
ArrayList<>();  
numbers.add(7);  
numbers.add(29);  
numbers.add(33);  
numbers.add(15);
```

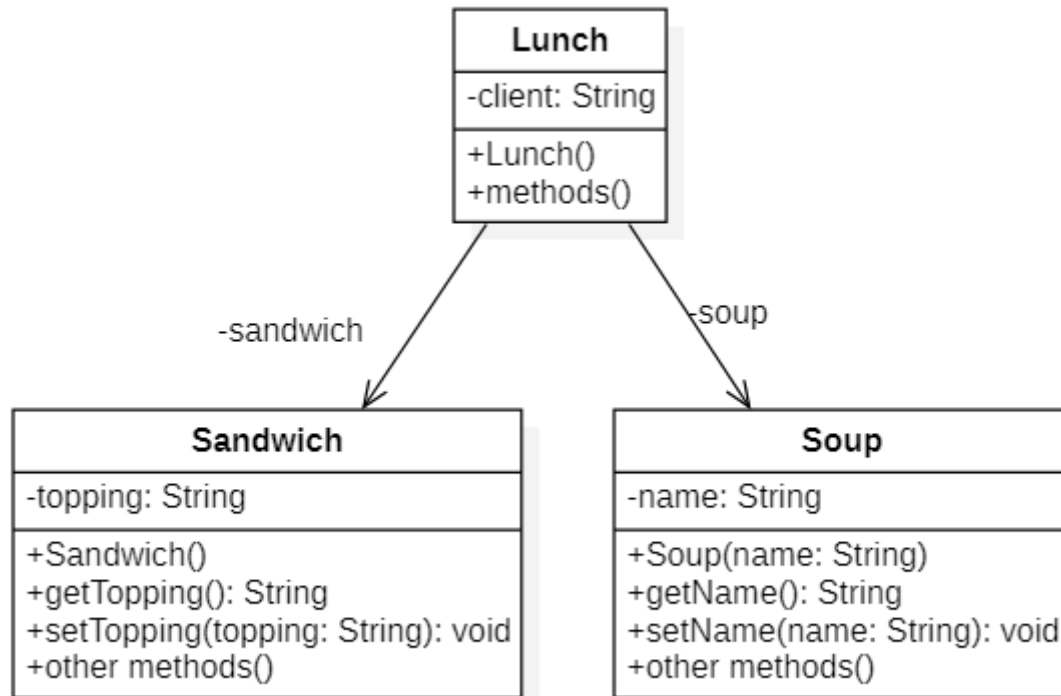

7	29	33	15
---	----	----	----

- Check whether the ArrayList contains elements?
If so, make the list empty.
If not, give a message.

Exercises on Association

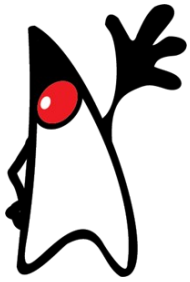

- Which methods are indispensable in the class Lunch?
- Create a Lunch-object and print the name of the client and what he eats for lunch.

Lunch for Georges Kendall:
Sandwich cheese and pumpkin soup.

Association – ArrayList

Exercises on ArrayList

```
ArrayList<Integer> numbers = new  
ArrayList<>();  
numbers.add(7);  
numbers.add(29);  
numbers.add(33);  
numbers.add(15);
```

7	29	33	15
---	----	----	----

- Choose the right method to change the ArrayList as follows:

7	29	8	33	15
---	----	---	----	----

- What is the size of this ArrayList? Add this number at the front of the ArrayList

2

```
// Insert an element at position 1  
    arrayList.add(position, "New Element");  
// arrayst.add(0,arrayList.size())
```

Exercises on ArrayList

```
ArrayList<Integer> numbers = new  
ArrayList<>();  
numbers.add(7);  
numbers.add(29);  
numbers.add(33);  
numbers.add(15);
```

7	29	33	15
---	----	----	----

- Check if the ArrayList contains the element 33?
 - If so, show the position of this number.
 - If not, add this number to the list.

3

```
int index = numbers.indexOf(33);  
if (index >= 0) {  
    System.out.println(index);  
} else {  
    numbers.add(33);  
}
```

Exercises on ArrayList

```
ArrayList<Integer> numbers = new  
ArrayList<>();  
numbers.add(7);  
numbers.add(29);  
numbers.add(33);  
numbers.add(15);
```

7	29	33	15
---	----	----	----

- Check whether the ArrayList contains elements?
If so, make the list empty.
If not, give a message.

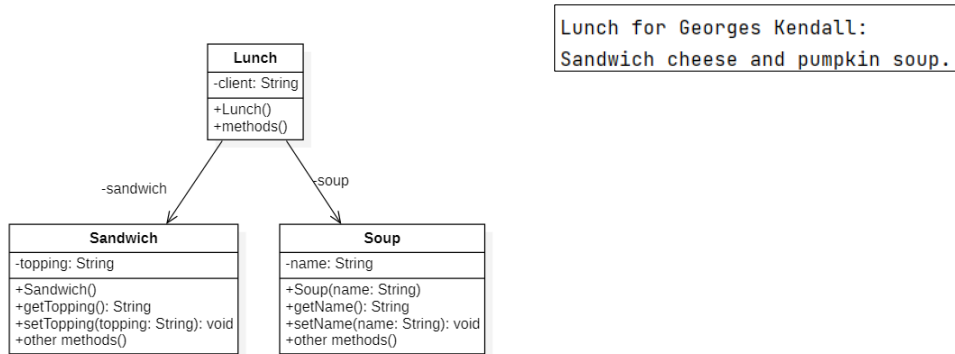

4

```
if (arrayList.isEmpty()) {  
    System.out.println("The ArrayList is already  
empty.");  
} else {  
    arrayList.clear();  
    System.out.println("The ArrayList has been  
emptied.");  
}
```

Exercises on Association

- Which methods are indispensable in the class Lunch?
- Create a Lunch-object and print the name of the client and what he eats for lunch.
